MACRO NATURAL

The energy of nature

Nature escapes us yet we feel the daily need to lead us back to it: more and more often the architectural and environments are pervaded by greenery, plant walls or other spaces designed specifically to welcome it and make it an integral part of our life. Different housing trends have been influenced by it, defined as “eco-style” or “eco-chic”, which aim at the integration of colors, objects, and natural materials within the environments to make them warmer and less artificial. This is how finishes, architectural forms, chromatic tones, walls and furnishing accessories are inspired or sometimes imitating the world of a hidden and wonderful nature that always offers great charm to the observer.

The Frame Trends Macro Natural line is inspired by this trend and with its three versions nature enters the environment giving you a unique and relaxing style.

MATERIA

Vintage style

It represents the evolution of the industrial style, merged with the trail that the strong vintage trend has left. However, everything is revisited in a more neutral key, where the protagonists are the materials, left raw and unfinished to create a strong contrast with the furnishing objects placed inside. The interiors are real scenographies with strong suggestions, which seem places recovered from the past, but combined with modern furnishing elements and often heterogeneous in style. Walls and wall finishes imitate raw concrete, often combined with surfaces and objects in living wood, with a deliberately unfinished appearance, to recreate the effect of an object recovered from the past.

The Frame Trends Materia line is certainly the most decisive version of the four Frame Trends styles, with its three graphic variants with a grunge character that recalls the industrial and metropolitan style.

ETEREO

Effects of lights and shadows

It arises from the desire to lose the connection from reality, so hard and material, rising towards a more ethereal dimension, where you can relax your mind and body and rediscover your inner purity. The environments under the influence of this trend are made up of light colors, tending to white, combined with natural materials and transparencies that make the material impalpable.

Play of shades and lights with imperceptible contours merge exterior and interior and reconnect the outside, the natural element is present but in a pure and essential way. The furniture is minimal and using lights and shadows an intense and meditative atmosphere is created. With this influence the tree radiator versions of the Frame Trends Etereo line are born, which combine the already clean and neutral lines of the radiator with pure graphics that give purity and lightness to any environment, both living and bathroom.

POP MEMORY

Geometric style

This trend, which probably starts from the world of fashion, brings to light the graphic and chromatic styles of the world of Pop Art using comic slogans, bright colors, and icons typical of those years.

Interior design also intercepts other trends, such as “eclectic style” or “geometric style” in which we witness the combination of heterogeneous patterns with two dimensional and geometric shapes, stripes, polka dots and vibrant or contrasting colors such as black and white.

Three unique radiator variants for the new Frame Trends Pop Memory line, furnishing elements with an unmistakable style and a strong chromatic impact, capable of playing down and giving character to environment.
