HOW TO PLACE ELECTRIC RADIATORS

The national rules on installing electrical equipment in the bathroom must be scrupulously respected. The electric radiators must be always installed outside zone 1 and 2.

In particular the electric switch and control elements must be mandatorily located in zone 3, in order that no electrical control center is accessible to anyone using the shower or bath.

EACH RADIATOR IS UNIQUE

Each Tessuto radiator is unique, the image is always similar to the original but the rhythm is always different, resulting in infinite rhythms and designs. The assembly of the elements involves random combinations of the motif that makes each radiator a "unique" piece different from the others.
